

I am writing to let you know how letting LPFM stations take priority over current FM translator stations will affect myself and my community. There is a station in my city, Air1 (89.5), that provides positive faith based music that my whole family can listen to. I have young children and if Air1 were to be replaced, that would be one more station my children couldn't listen to. It is very important for children to have positive alternatives to a lot of the music that is currently being broadcast.

Also, Air1 is deeply committed to helping each community it broadcasts to. For example, many times throughout the day, they play a spot promoting volunteering at local homeless shelters. These spots include testimony from those whose lives have been positively impacted by such shelters.

Please take careful consideration in allowing LPFM stations take priority over existing FM translator stations. The impact can be far reaching.

Thank you.
